Personality is essentially the behavior which gets naturally reflected in an individual without much effort and under normal circumstances. Researchers believe that behavior is determined by both genetics and situations and unlike Aptitude, improvement in Personality traits is possible. Any career that one chooses should be complimentary to one's Personality. For Example, if you are an introvert, you would be at your best if you choose a career which requires you to work alone. Thus it is equally important to know about your personality and choose a career accordingly.
